HP 1810 Switch Series

Key features
• Customized operation using intuitive Web interface
• Flexible connection and deployment options
• Layer 2 operation at wire speeds
• Fanless design for quiet operation
• Lifetime warranty

Product overview
HP 1810 Switch Series devices are smart-managed, fixed-configuration Gigabit Ethernet and Fast Ethernet Layer 2 switches designed for small businesses looking for key features in an easy-to-administer solution. The series includes 8- and 24-port Gigabit Ethernet and Fast Ethernet models and a 48-port Gigabit Ethernet switch. Specific models include SFP ports for fiber connectivity. All models support flexible deployment options, including mounting on walls, under tables, or on desktops. Some models are fanless, making them ideal for office deployments. The 8-port Gigabit Ethernet model can optionally be powered by an upstream Power over Ethernet (PoE) switch. Customizable features include VLANs, Spanning Tree, and link aggregation trunking. The 8- and 24-port models include the latest energy-saving capabilities—Energy Efficient Ethernet (EEE) and idle-port power down—as well as Rapid Spanning Tree Protocol (RSTP) and DSCP QoS policies. All come with a lifetime warranty.
Features and benefits

Connectivity
• Auto-MDI/MDIX
  automatically adjusts for straight-through or crossover cables on all ports
• Packet storm protection
  protects against broadcast, multicast, or unicast storms with user-defined thresholds
• IEEE 802.3af PoE-powered device option (8-port Gigabit Ethernet model)
  can obtain power from a standard PoE device on Port 1, making the switch ideal for deployments where a power outlet is not available; such flexibility helps you extend the network to wherever an Ethernet cable can reach
• SFP ports for fiber connectivity
  the three true non-combo SFP port models use fiber connections for uplinks and other connections across longer distances than copper cabling; true SFP ports operate in addition to available copper Ethernet ports; combo ports are shared connections, either operating as a copper connection or as a fiber connection

Performance
• Half-/Full-duplex auto-negotiating capability on every port
  doubles the throughput of every port
• Link aggregation (trunking)
  brings together groups of ports automatically using Link Aggregation Control Protocol (LACP) or, manually, to form an ultra-high-bandwidth connection to the network backbone; helps prevent traffic bottlenecks; the 8-port models have four trunks of four links each, the 24-port models have eight trunks of four links each, and the 1810-48G switch has 16 trunks of eight links each

Quality of Service (QoS)
• Traffic prioritization (IEEE 802.1p)
  allows real-time traffic classification with eight priority levels mapped to four queues
• IEEE 802.1p prioritization with DSCP (v2 models)
  switch delivers data to devices based on the priority and type of traffic using Differentiated Services Code Point (DSCP)
• Broadcast control
  allows limitation of broadcast traffic rate to cut down on unwanted network broadcast traffic

Layer 2 switching
• VLAN support and tagging
  support up to 64 port-based VLANs and dynamic configuration of IEEE 802.1Q VLAN tagging, providing security between workgroups
• Jumbo packet support
  supports up to 9220-byte frame size to improve the performance of large data transfers

Resiliency and high availability
• IEEE 802.1D Spanning Tree Protocol (STP) and IEEE 802.1W Rapid Spanning Tree Protocol (RSTP; v2 models)
  provide redundant links while preventing network loops

Security
• Secure Sockets Layer (SSL)
  encrypts all HTTP traffic, allowing secure access to the browser-based management GUI in the switch
• Automatic denial-of-service protection
  monitors six types of malicious attacks and protects the network by blocking the attacks
• Management password
  provides security so that only authorized access to the Web browser interface is allowed

Ease of use
• Locator LED (switch)
  allows users to set the locator LED on a specific switch to either turn on, blink, or turn off; simplifies troubleshooting by making it easy to locate a particular switch within a rack of similar switches
• Comprehensive LED display with per-port indicators
  provides an at-a-glance view of status, activity, speed, and full-duplex operation

Flexibility
• Flexible mounting options
  mounting options include wall, desktop, or under-table configuration for flexible installation
• Rack mountable (24- and 48-port models)
  offers a rack-mounting option with included hardware
• Kensington lock slot
  allows switches to be physically secured in open-space deployments

Management
• Simple Web management
  intuitive Web GUI allows for easy management of device by even nontechnical users
• Secure Web GUI
  provides a secure, easy-to-use graphical interface for configuring the module via HTTPS
• SNMPv1, v2c
  enables devices to be discovered and monitored from an SNMP management station
• Dual flash images
  provide independent primary and secondary operating system files for backup while upgrading
• Port mirroring
  enables traffic on a port to be simultaneously sent to a network analyzer for monitoring
• IEEE 802.1AB Link Layer Discovery Protocol (LLDP)  
  advertises and receives management information from adjacent 
  devices on a network, facilitating easy mapping by network 
  management applications

Additional information

• Energy savings (v2 models)  
  utilizes Energy Efficient Ethernet (EEE) IEEE 802.3az standard for 
  lower power consumption

• Green IT and power  
  automatically places inactive ports in low power mode and its LED in 
  power-down mode to conserve energy

• Green initiative support  
  provides support for RoHS and WEEE regulations

Warranty and support

• Lifetime warranty  
  for as long as you own the product with advance replacement and 
  next-business-day delivery (available in most countries)†

• Electronic and telephone support  
  limited electronic and telephone support is available from HP; to 
  reach our support centers, refer to 
  www.hp.com/networking/contact-support; for details on the 
  duration of support provided with your product purchase, refer to 
  www.hp.com/networking/warrantysummary

†HP warranty includes repair or replacement of hardware for as long as you own the product, with next business day advance replacement (available in most countries). The disk drive included with HP AllianceOne Advanced Services and Services zl Modules, HP Threat Management Services zl Module, HP AllianceOne Extended zl Module with Riverbed Steelhead, HP MSM765zl Mobility Controller and HP Survivable Branch Communication zl Module powered by Microsoft Lync has a five-year hardware warranty. For details, refer to the Software license and hardware warranty statements at www.hp.com/networking/warranty.
